stone and
natural stone

GLEN-GERY mortar

PREBLENDED PORTLAND, LIME and SAND
Type N, Type S and Stone Veneer

- Glen-Gery Type N
- Glen-Gery Type S
- Glen-Gery Stone Veneer
(Available in PBM-404 and PBM Natural Grey only)

Glen-Gery Mortar

is recommended for exterior or interior use, for above or below grade applications, and for load-bearing and non-load bearing construction. Glen-Gery mortars can be used to lay brick, block, manufactured stone, natural stone, or as underlayment for slate, marble and tile per specification. Glen-Gery Mortar can also be used to repair (tuckpoint) loose or cracked mortar joints.

- High compressive strength
- High bonding strength
- Better rain penetration resistance
- Predictability
- No fillers or additives
- No field mixing
- Excellent workability
